Noé **PARETI**

GAME DEVELOPER (UNREAL ENGINE / C++) — LOOKING FOR A 6-MONTH INTERNSHIP

Available from December 2026

Paris | 07 68 40 75 78 | noepareti@gmail.com

linkedin.com/in/noe-pareti | github.com/Noe-prt | Portfolio

42 Paris student and **Unreal Engine C++** developer. During a 6-month internship I shipped a co-op game on Steam as the sole developer, and I published a multiplayer plugin on Fab. I'm looking for a 6-month internship as a Gameplay / Game Programmer.

TECHNICAL SKILLS

Languages: C++, C, C#, Blueprint, GDScript, TypeScript

Engines: Unreal Engine 5, Unity, Godot

Gameplay: gameplay programming, game systems, UI, plugin development

Multiplayer: replication, client-server architecture, real-time synchronization

Tools: Git / GitHub, Visual Studio, Docker, Linux

Also: web development (React, Next.js, TypeScript)

SOFT SKILLS

- **Autonomy** — sole developer of a game shipped in 3 months
- **Teamwork** — peer-learning, code review (42 pedagogy)
- **Problem solving** — debugging, network synchronization

LANGUAGES

French: Native

English: Work proficiency

INTERESTS

- **Video games** — co-op and competitive multiplayer games
- **Sports** — tennis, football
- **Music** — guitar

EDUCATION

42 Paris Nov 2024 – 2029

Pursuing IT Architecture Expert — RNCP level 7

- Completed common core: C, C++, algorithms, Unix systems, networking, Docker
- Project-based, peer-to-peer learning with no lectures or teachers

PROFESSIONAL EXPERIENCE

Game Developer — 6-month Internship

Adzap · video game startup · Paris Feb 2026 – Jul 2026

- Designed and built *ElectroFix Simulator*, a co-op simulation game, **as the sole developer** — from design to **release on Steam in 3 months**
- Programmed the gameplay systems and full game logic in **Unreal Engine (C++ / Blueprint)**
- Implemented **multiplayer replication** with a client-server architecture and real-time synchronization between players
- Owned the end-to-end release cycle: Git versioning, builds and Steam publishing

GAME PROJECTS

UMPS — Multiplayer Phone System Fab

Unreal Engine plugin · Published on Fab

Unreal Engine · C++ · Blueprint · Replication

- Built a plugin that simulates an in-game smartphone, fully compatible with multiplayer
- Replicated apps: messages, video calls, camera, web browser and more
- Packaged and published it on the Fab marketplace

Multiplayer FPS Video

CS:GO-inspired shooter · Personal project

Unreal Engine · C++ · Networking · Replication

- Built a multiplayer FPS to master C++ and Unreal Engine's replication system

ft_transcendence Video · GitHub

Real-time multiplayer Pong · 42 School

TypeScript · WebSocket · Next.js · Redis

- Built real-time multiplayer matches over WebSocket in a full web application

Cub3D GitHub

Raycasting engine · 42 School

C · Raycasting · MiniLibX

- Rendered a 3D maze from a 2D map with raycasting, Wolfenstein 3D style

so_long GitHub

2D game · 42 School

C · MiniLibX

- Built a 2D top-down game in C: map parsing and validation, sprites, collectibles and exit
